

Rizky Andika Pratama

Data Scientist & Machine Learning Engineer

rizky.andika@email.com | +62 813-5678-9012 | linkedin.com/in/rizkyandika | github.com/rizkyandika

PROFESSIONAL SUMMARY

Data Scientist with 6 years of experience transforming complex business problems into data-driven solutions. Specialized in machine learning, NLP, and MLOps with a strong background in the e-commerce and fintech industries. Proven track record of deploying production-grade ML models that directly impact revenue and user experience. Experienced in cross-functional collaboration with product, engineering, and C-level stakeholders.

EDUCATION

Bachelor of Science in Statistics -- Institut Pertanian Bogor (IPB University)

Graduated: A

Machine Learning Engineering Bootcamp -- Hacktiv8 (2019)

9-week intens
deployment.

WORK EXPERIENCE

Senior Data Scientist -- Shopee Indonesia (March 2022 - Present)

- Led a team of 4 data scientists to build a real-time product recommendation engine serving 8 million daily active users, contributing to a 17% increase in GMV.
- Developed an NLP-based review moderation system using fine-tuned IndoBERT, reducing manual review workload by 65%.
- Designed and maintained end-to-end MLOps pipelines on GCP using Vertex AI, Airflow, and Docker, cutting model deployment time from 2 weeks to 2 days.
- Collaborated with the product team to define KPIs and A/B testing frameworks for 12+ experiments per quarter.

Data Scientist -- OVO (Fintech Division) (June 2019 - February 2022)

- Built a credit scoring model for OVO PayLater using XGBoost and LightGBM achieving AUC-ROC of 0.89, enabling 200,000 new credit approvals.
- Developed a real-time fraud detection system processing 30,000 transactions per minute with under 50ms inference latency using FastAPI and Redis.
- Created automated reporting dashboards in Metabase connected to BigQuery, saving 10+ analyst hours per week.
- Mentored 3 junior data analysts in Python, SQL, and statistical modeling.

Data Analyst -- Tokopedia (August 2018 - May 2019)

- Performed cohort analysis and user segmentation for the logistics team, identifying drop-off points that led to a 12% improvement in delivery SLA.
- Built and maintained ETL pipelines using Python and Apache Airflow for daily BI reports consumed by 50+ stakeholders.
- Conducted ad-hoc analyses supporting quarterly OKR reviews for the COO office.

TECHNICAL SKILLS

Programming : Python (advanced), SQL (advanced), R, Bash

ML / AI

SELECTED PROJECTS

RAG-based Document Q&A System (2024)

Designed and implemented a Retrieval-Augmented Generation (RAG) system using FAISS, and L

Multimodal Sentiment Analysis for Product Reviews (2023)

Built a multimodal sentiment analysis model using a combination of ResNet-50 and

Automated Feature Store for Fintech ML Models (2021)

Architected a scalable feature store for Fintech ML models, enabling point-in-time-e

CERTIFICATIONS

- Google Professional Data Engineer (2024)
- AWS Certified Machine Learning Specialty (2023)
- TensorFlow Developer Certificate -- Google (2022)
- Deep Learning Specialization -- Coursera / deeplearning.ai (2020)
